Subject: Draft SAP for Miller Chemical

Victor,

As we discussed, I've attached a draft SAP for surface water sampling at the Miller Chemical site. As you see, we're proposing to begin sampling tomorrow with a limited sample set and follow-up on Sunday with the full analytical suite that we discussed earlier.

Our thought process there is that with the weekend coming we won't see results from tomorrow's sampling until Tuesday (even with a next day turn), and we can get results from Sunday's samples on Tuesday as well. Waiting until Sunday to sample for all analytes therefore doesn't slow down our data receipt or your decision making and gives us a couple of days for the streams to continue flushing. Let me know if you have any comments or questions. Have a good evening.
